Matthieu Greiner

Paris, France | *greinermatthieu635@gmail.com*
matthieugreiner.com | *linkedin.com/in/matthieu-greiner* | *github.com/Spaghetto784*

Cybersecurity engineering student at EPITA (class of 2028), DevSecOps apprentice and malware researcher. Seeking a 6-month internship in the United States starting early 2028.

Education

EPITA, Engineering School of Computer Science — *Paris*
Engineering degree (Master's level) in Computer Science, Cybersecurity major — *2023 – 2028 (expected)*

Chulalongkorn University — *Bangkok*
Exchange semester, Computer Engineering — *2025*

Université Paris-Est Créteil (UPEC) — *Paris*
Bachelor in Computer Science — *2023 – 2026*

Experience

DevSecOps Engineer (Apprentice) | *intuitem, Vélizy* — *Sep 2026 – Present*
- Build features for CISO Assistant, an open-source GRC platform (Django, Svelte; 4,000+ GitHub stars, 3M+ downloads); merged pull requests include data-wizard import/export, custom field types and EBIOS RM fixes
- Keep every change compliant with the CI/CD pipeline; work with Kubernetes and multi-cloud environments
- Answer customer requests on the Jira support desk

Student Researcher | *EPITA Research Lab (LRE)* — *Oct 2026 – Present*
- Study malware evasion techniques on recent Windows x64 samples with dynamic binary instrumentation (Intel Pin)
- Track how evasion techniques evolve over time; goal: publish a paper before graduation (2028)

Information Systems & Security Engineer (Apprentice) | *SFR Business, Paris* — *2025 – 2026*
- Supported security governance and compliance (NIS2, DORA, GDPR, ISO 27001); ran risk analyses (EBIOS RM), audits and remediation tracking
- Built CyberTool, an internal Go utility checking TLS, DNS, HTTP responses and security headers, used by a 12-person team
- Contributed to an internal AI assistant for security questionnaires, adopted by the team and boosting its KPIs; automated security KPI reporting (Excel/VBA)

Teaching Assistant (Python / C) | *EPITA* — *2025 – 2026*
- Taught programming fundamentals and debugging

Software Development Intern | *Entrepose Échafaudages* — *2025*
- Developed a C# plugin for Autodesk Robot and automated engineering workflows

Projects

SecureFlow | *DevSecOps platform* — *github.com/Spaghetto784/SecureFlow*
React, FastAPI, PostgreSQL, Docker; CI security scans (Semgrep, Gitleaks, Trivy); JWT and Argon2 auth.

wlkom-rootkit | *EPITA systems project* — *C, Python*
Educational Linux kernel module built in an isolated two-VM QEMU lab, with a secure TCP client/server protocol.

Budgify | *Privacy-first iOS app* — *Swift, SwiftUI*
On-device ML categorization, Face ID, AES-GCM encryption and Keychain key management; no external services.

Technical Skills

Languages: C, Go, Python, Java, C#, Swift, SQL, JavaScript, TypeScript
Systems: Linux, kernel modules, QEMU/KVM, GDB
Security: malware analysis, Intel Pin (DBI), vulnerability analysis, TLS/DNS
DevOps & Cloud: Git, Docker, Kubernetes, CI/CD, REST APIs, AWS, Azure
Frameworks: Django, Svelte, FastAPI, React
GRC: EBIOS RM (certified Risk Manager), ISO 27001, NIS2, DORA, GDPR; CompTIA Security+ (in progress)

Languages & Interests

Languages: French (native), Armenian (native), English (Cambridge C1), Spanish (B1)
Interests: electric guitar, CTF competitions, reading
